Background Papers:

Tree Management Principles 2020

Implications:

Relationship to Corporate Priorities	This report supports the Corporate Priorities: Health and Wellbeing Green and Connected Pride in Our Area
Relationship to GM Policy or Strategy Framework	Management of trees fits with the GM 5 year Environmental Plan
Financial	Tree management will be undertaken within existing resources. Failure to comply with legal

	obligations can result in payment of damages.
Legal Implications:	The Council has various legal obligations relating maintenance of its trees such as Occupier's Liability, Nuisance and Negligence. If it breaches these obligations it could be liable for payment of damages relating to injury to persons and property.
Equality/Diversity Implications	No implications
Sustainability Implications	Effective management of trees can have an impact on sustainability of across the Borough. There are no adverse effects on biodiversity or climate as a result of this report but seeks to enhance where possible
Resource Implications e.g. Staffing / ICT / Assets	None
Risk Management Implications	By not having an approved set of principles relating to management and maintenance of trees the authority could be at risk of increased demand to manage trees differently.
Health & Wellbeing Implications	Trees can have positive benefits to peoples' health and wellbeing
Health and Safety Implications	By not managing trees effectively there could be Health and Safety implications resulting from poor management and maintenance of the tree stock in Trafford.

1.0 Background

- 1.1 The Council has an extensive tree stock across the Borough that requires a form of continuous management and maintenance. There are trees present on council land including 18,000 highway trees, with 40Ha of woodland with a variety of species and trees in parks, open spaces and schools and in residential areas.
- 1.2 Trafford's Tree Policy has been in place for a number of years and required updating to ensure it meets with current tree management principles. The Council has a duty under the Health and Safety at Work Act to have in place an effective system for managing trees that ensures trees do not present a risk to the public mainly from falling in their entirety or also from falling branches.
- 1.3 A range of relevant guidance has been produced by various organisations, including the National Tree Safety Group, the Arboricultural Association and the Forestry Commission. Their guidance provides advice to help duty holders such as Trafford to comply with the Occupiers Liability Acts and other legislation relevant to trees. However, it should be noted that the guidance represents 'best practice' guidance for managing trees and each Authority is expected to have their own effective system for managing trees relevant to their land ownership and tree stock profile.
- 1.4 The updated Tree Management Principles covers how the Council will manage the tree stock in addition to ensuring that it is safe. The document also identifies how the council will respond to tree planting, requests for tree pruning, tree removal and other impacts that trees can have on the public, land or highway.

2.0 Other Options

2.1 The option to continue to manage trees referring to the existing policy was considered however, it does not address the current issues facing the longer term management and maintenance of trees.

3.0 Consultation

3.1 The Tree Management Principles will be published for consultation following approval by the Executive Member.

3.2 The on-line consultation period will run from 8th June to 8th August 2020 and the outcome of the consultation and final report is proposed to be presented back to Executive for approval in September 2020.

4.0 Reasons for Recommendation

4.1 The existing tree policy is out of date and requires updating to reflect current issues surrounding the management and maintenance of trees.
