

Questions Received for Council – 20 March 2019

Question 1 - Submitted by Councillor Jerome

Medway Crescent is being used as a cut-through from Oldfield Road to the A56 with cars often driving at great speed. As developments go up across Altrincham and further parking restrictions are consulted and implemented, what is this council doing to promote safe and controlled traffic routes??

Question 2 - Submitted by Councillor Brophy

Please would the Executive Member confirm the details of the Trafford Borough air quality monitors (and also of the contiguous boroughs since air pollution does not recognise boundaries).

Would the Executive Member confirm the exact geo-location, the type of location e.g. roadside / urban background, what's monitored e.g. NOx PM?

Can a mapped pollution inventory / land use regression model for Trafford and contiguous boroughs be provided?
