The Committee considered the Minutes from the meeting on 4 March. Councillor Chilton provided the Committee with a verbal update regarding his visit to the Meadway Health Centre. He informed the Committee that Pennine Health Care NHS Trust are recruiting more district nurses to meet demand as highlighted within their recent review. Pennine had also offered to share the results of their review with the Committee.

Councillor Chilton recommended that the Head of Service at Meadway Health Centre be invited to deliver a presentation on the recent district nursing review in October.

6. TRAFFORD CARE COORDINATION CENTRE

The Chief Operating Officer of Trafford Clinical Commissioning Group (Trafford CCG) attended the meeting and delivered a presentation to the Committee on the Trafford Care Coordination Centre (TCCC).

The presentation described the way that the TCCC will track patients to create a more holistic approach to health care. The new system was intended to simplify healthcare for patients with only one phone number for all health services. The system had cost £15 million but projections indicated that it would make back the investment within 2 years of running.

All patients would be asked whether they were happy with their information being stored and shared with an alternative pathway in place for those who opt out. Once a patient was signed up to the system all contact with health services would be conducted through it and, over time, data would be collected to create a profile which would be continually updated to enable a patient centred approach.

The Committee inquired about the TCCC. These included questions about patient experience, how the system would deal with different referral processes and how the public would be informed about the TCCC. The Chief Operating Officer gave detailed answers to the questions raised by Members and invited them to visit the TCCC in October 2015 once phase two is in place.

The Committee thanked the Chief Operating Officer for attending the meeting and giving an update.

7. SPECIALISED CANCER SERVICES

The Chief Operating Officer of Trafford Clinical Commissioning Group (Trafford CCG) provided an update to the Committee on specialised cancer services within Greater Manchester.

The Chief Operating Officer explained that under Devolution Manchester, Trafford CCG would be the lead for specialist commissioning across Greater Manchester and included four specialised cancer services and that gynaecological and hepatobiliary cancer services were fully compliant with NHS guidelines and upper GI cancer services were mainly compliant with a few gaps remaining.

A number of issues had occurred while trying to implement a similar reconfiguration in Urology. These issues had led to the service going through a procurement process earlier in the year. However, the subsequent award had been challenged and meant that the existing pathways for Urology services had remained in place.

The Chief Operating Officer informed Committee members that this work was continuing as part of Devolution Manchester with the aim of the service being compliant by March 2016.

RESOLVED:

- 1) That the Chief Operating Officer be thanked for her update.
- 2) That the update be noted.

The report detailed the aims and proposed outcomes of the review being carried out within CAMHS in 2015/16. The Head of Service stated that by going through the review process and ensuring that resources were utilised in the most efficient way CAMHS could meet savings targets whilst improving the service.

Committee members raised a number of questions about the proposed review and savings. The questions covered various aspects of the service including the support in place for the transition of children to adult services, the year on year
